

The Task – 15 Minute Presentation

Create and deliver a three-slide presentation about your ETL Project and a reflection of how you got on with developing it

Ways of Working –

Reflection on how you found working on the project alone as opposed to in a team.
What project documentation, processes and procedures did you use whilst, planning, designing, developing and testing

How did you break down the development tasks

How did you use of GIT for version control Code

How did you stay on task and meet the project deadline

Infrastructure -

Create an architecture diagram of your ETL project, what does each component do (Load, Transform, Normalise, Store), what design decisions did you make.

Final Project Reflection -

Reflection on what you learned in the development process, what skills you need to develop further, Technical and Soft Skills
